Professional Working Proficiency

PERSONAL PROJECTS

Entropy

- My final project at Lighthouse Labs is a flow chart editor with real-time collaboration. Entropy was built using React, React Flow, Yjs, Firebase/Firestore, and Material UI. Users are able to create flow chart diagrams and share and edit them with others, all in real-time.

Tweeter

- Tweeter is a simple, single-page Twitter clone built with HTML, CSS, Javascript, and jQuery on the front end, and Node.JS and Express on the back end. Users are able to post tweets and view their past tweets.

Quiz App

- An app that lets you create quizzes and share them between friends. Built with Javascript, jQuery, and SASS on the front end and Express on the back end with a PostgreSQL database.

Interview Scheduler

- Interviewer Scheduler is a single page application built with React that allows users to book, edit, and delete student interview appointments.

TinyApp

- TinyApp is a full stack web application built with Node and Express that allows users to shorten long URLs (à la bit.ly).

WORK EXPERIENCE

Market Sales Coordinator TradeRev

12/2018 - 09/2019

Vancouver
